360 Supported Languages

All of Fontwerk's Non-Afrikan typefaces support at least 94 Latin-based European languages such as English, German, French, Spanish, Czech, Polish, and Turkish. Some families also support Greek and Cyrillic (e.g. Russian, Bulgarian). If you need further languages or script systems (anything from Cyrillic and Greek to Hebrew, Arabic, Thai and even Chinese, Japanese, Korean (CJK), and Devanagari), we can make custom fonts for you. However, Pangea Afrikan is different. It supports the following 360 languages.

7380 7380

It's only been a year and a half since Pangea was first released but thanks to the ongoing donation of a quarter of all designer royalties, over 75,000 trees have been planted and at least 2,600 tonnes of CO₂ has been offset. Meanwhile, Pangea also continues to pursue its second major goal: connecting cultures and continents. One way in which it does this is by promoting underrepresented languages.

From the outset, Pangea included European Latin, Greek, Extended Cyrillic (including overlooked languages such as Kyrgyz or Bashkir) and Vietnamese as well as characters for the transcription of Arabic and Sanskrit. The next language extension milestones planned are Hebrew and Arabic (Persian, Urdu, Dari as well as Pashto).

Designer Christoph Koeberlin sees Pangea as an inclusive typeface family. Its name refers to his approach of considering different cultures and continents as part of a common whole. His continuous language extensions challenge Western conventions, as more often than not successful typefaces usually only represent the alphabets of Europe and America. Pangea Afrikan marks an important milestone in this respect: it adds Latin African to its language toolbox. Providing support for languages including Hausa, Yoruba, Igbo, Lingala, Mende, and Umbundu, as well as some indigenous North Ameri-

can languages such as Lushootseed and Navajo—the languages of over 430 million people.

Fontwerk's mission is to make typography affordable and accessible to all. We don't want to make extensive language support like Cyrillic, Greek or Arabic an expensive additional barrier or obstacle to great typography. With this comprehensive update, we even go one big step further based on Christoph's suggestion: **Pangea Afrikan is permanently free of charge and included in the Standard License!** We hope that brands, agencies and individual designers will be able to benefit from this.

Stylistically, the extension remains true to the tried and tested Pangea formula: the space-saving compactness of the narrow typefaces of the mid-20th Century is transferred to a straightforward, geometric sans serif. That means a stately x-height, ascenders that correspond to the capital letters,

and letters that are hardly open. The font owes its finely balanced lightness to diagonal ends and round dots. With two optical sizes, Pangea Afrikan and Pangea Afrikan Text, something that is rather rare in the geometric genre, users get enormous flexibility and design consequence.

This update does not however, mean the end of the language extension. Together with local designers, additional Non-Latin alphabets such as N'Ko or Classical Ethiopic are in the works. These will also be available to existing and future customers at no cost. Until then, however, a little patience is required and it is important to trust the Tanzanian proverb *'Haraka Haraka haina baraka'* (Hurry hurry has no blessings).

In [his blog](#), Christoph describes the genesis of this project in more detail and makes suggestions for a Latin character set that goes beyond the borders of Europe and the Americas.

DESIGNER

Christoph Koeberlin

Christoph Koeberlin has polished, finessed and refined typefaces for a number of the top labels such as *FontFont*, *Swiss Typefaces*, *TypeBy*, *HVD Fonts*, *Milieu Grotesque* and *Production Type*. Without him the Fontwerk Engineering Team would not be the same. As a very good friend of the company from its inception, he has been a great support to what we are doing and will always have a place of honour in our story.

Proof of his prowess as an exceptional type designer is demonstrated through the fact that his first families, FF Mark (designed in collaboration with Hannes von Döhren and the FontFont Type Department in 2013 and Fabrikat (HVD Fonts 2016) very quickly became bestsellers. At the moment, he is concentrating on his project sportsfonts.com and in particular, on custom type projects. His exclusive custom typefaces for his favourite football team 1. FC Kaiserslautern and for the Bundesliga Club FSV Mainz 05 were

© Lars Wiedemann

The father of two sons, he loves to work with others, especially on his beloved typographic knowledge website, Typefacts. All of this mostly takes place in his legendary allotment garden office in Prenzlauer Berg, where in quieter moments, he also thinks about sustainability,

chocolate and expanding his record collection.

File Formats and Licensing

All our typefaces are provided in OTF (OpenType fonts with PostScript outlines; usually used for desktop, apps, ebooks, and hardware) and WOFF as well as WOFF2 (Web Open Font Format; OpenType fonts for the use on the web) formats. Most other formats such as EOT, SVG, or TTF are not necessary anymore today. However, we can generate those files in case they are really needed.

We believe we have one of the simplest licensing models in the industry. If we were sitting in the pub, we could draw it out on a beer mat. It's hard enough to find the right font, so we want to make the licensing as simple as possible. What does this mean? No drop-down-menus, just a LICENSE IN ONE CLICK. You pay just once and that's that as long as you keep within the boundaries of use as stated in the License.

Please check our website fontwerk.com/licensing for further information.

TRIAL

1 User for testing purposes only

[CLICK HERE TO DOWNLOAD
FOR FREE NOW!](#)

STANDARD

Print: 1 User
Web: 100,000 Pageviews/month
App: 1,000 Downloads
eBook: 10,000 Downloads

EXTENDED

Print: 15 Users
Web: 1,500,000 Pageviews/month
App: 15,000 Downloads
eBook: 150,000 Downloads
Broadcasting: 1,500,000 Viewers

TRIAL The 'Trial Fonts' contain around ¾ of the actual characters and usually no OpenType features. The license allows free use during the test phase. Both desktop and webfonts are included so that you can design mockups, websites, apps and eBooks etc. and then present to the client without having to commit to the purchase. Only when it is clear that the font fits and the actual projects go live or are produced, will you need to purchase the Standard version.

STANDARD Our most popular license that includes use in Print (desktop) for one user for use on the Web (100,000 pageviews per month), in an App (1,000 downloads) and eBooks (10,000 downloads). If more users, pageviews or downloads are required, either several Standard licenses or an Extended license must be purchased.

EXTENDED This is comparable to a MUL, a multi-user-license. Extended covers use in Print for 15 users with total use on the Web (1.5 million pageviews per month), in Apps (15,000 downloads) and eBooks (150,000 downloads). It is also the right license for use in Broadcasting (1.5 million viewers).

ENTERPRISE For all other situations that are not covered by one of these licenses, an individual agreement is necessary.

We craft modern typefaces and provide innovative font engineering and type design services.

We **believe** that convincing communication is only possible with the most aesthetically pleasing and most technically sound fonts.

Our **vision** is to provide easy access to such fonts through free trial versions, a simple licensing model and one of the fastest ordering processes around.

Our long-lasting designs add **value** above and beyond the actual cost. These fonts can be downloaded directly by discerning

agencies, designers and brands or ordered as a perfectly fitting custom type solution in addition to font engineering services.

We hope to **contribute** to something bigger by promoting talented designers from around the world with whom we work under the fairest conditions.

Our **motivation** is simply the love of good design. Outstanding type is our contribution to that.
